DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-26, drawn to a main frame of a customizing pack carrier, classified in class 280, subclass 727+.
 - II. Claims 27-35, drawn to a base frame for a carrying pack, classified in class 224, subclass 628.
 - Claims 36-47, drawn to comfort padded back support, classified in classsubclass 644.
 - IV. Claims 48-49, drawn to a lumbar support, classified in class 224, subclass637.
 - V. Claims 50-51, drawn to a method of adjusting the relative positions of a pair of nesting tubes, classified in class 285, subclass 1+.
 - VI. Claims 52-59, drawn to a method of providing a quasi-permanent terminal extended height of an extendable column, classified in class 285, subclass1+.
 - VII. Claims 60-63, drawn to a method for providing an accessory, classified in class 40, subclass 1+.
 - VIII. Claims 64-68, drawn to a selection of shoulder adaptors, classified in class 224, subclass 643.

Art Unit: 3727

- IX. Claims 69-74, drawn to a method of transforming a pack carrier, classified in class 224, subclass 153.
- X. Claim 75, drawn to a clasping article 901, classified in class 224, subclass269.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I-IV, VIII and X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the above inventions has separate utility in that they can all be used individually to improve on an existing back pack. See MPEP § 806.05(d).
- 3. Inventions I and V-VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process as claimed can be used on an adjustable rack for the bed of a pickup truck.
- 4. Inventions II and IX are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process as claimed can be used on an existing back pack.

Art Unit: 3727

5. Inventions I-VI, VII-X and VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not related.

- Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners", M.P.E.P. 203.08.
